

*glass in perfection &
endless possibilities*

NEW COLLECTION 2023

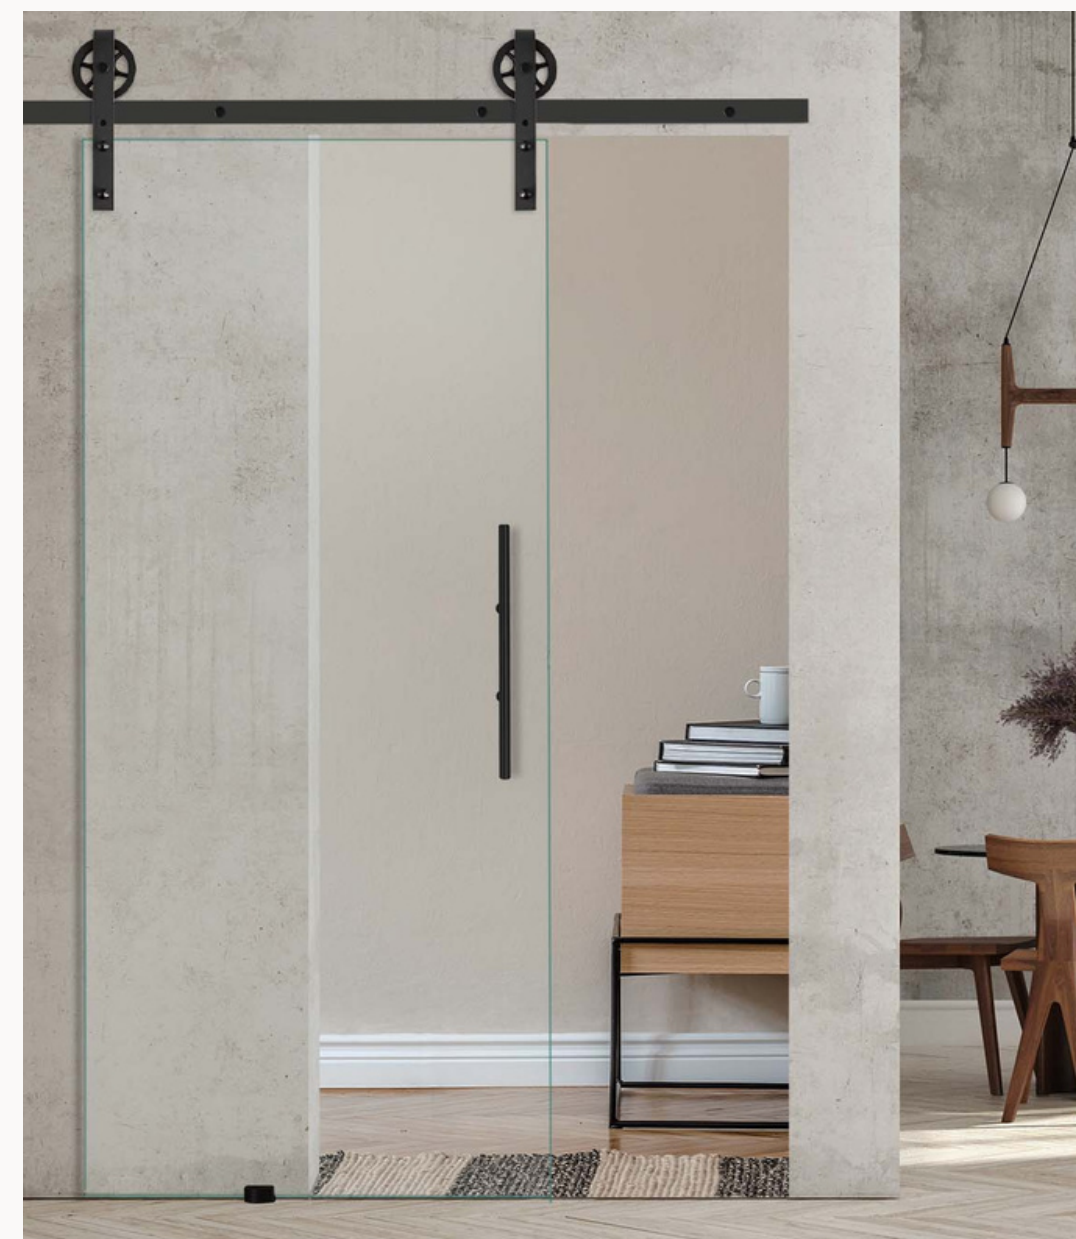

Sliding systems

AG50

V1000

Corvara

All designs can be combined with any sliding system.

digital printing on glass

Our motifs are printed with 300dpi directly on the glass. The glasses are opaque but translucent. The printing is located on the back of the door.

laser engraving

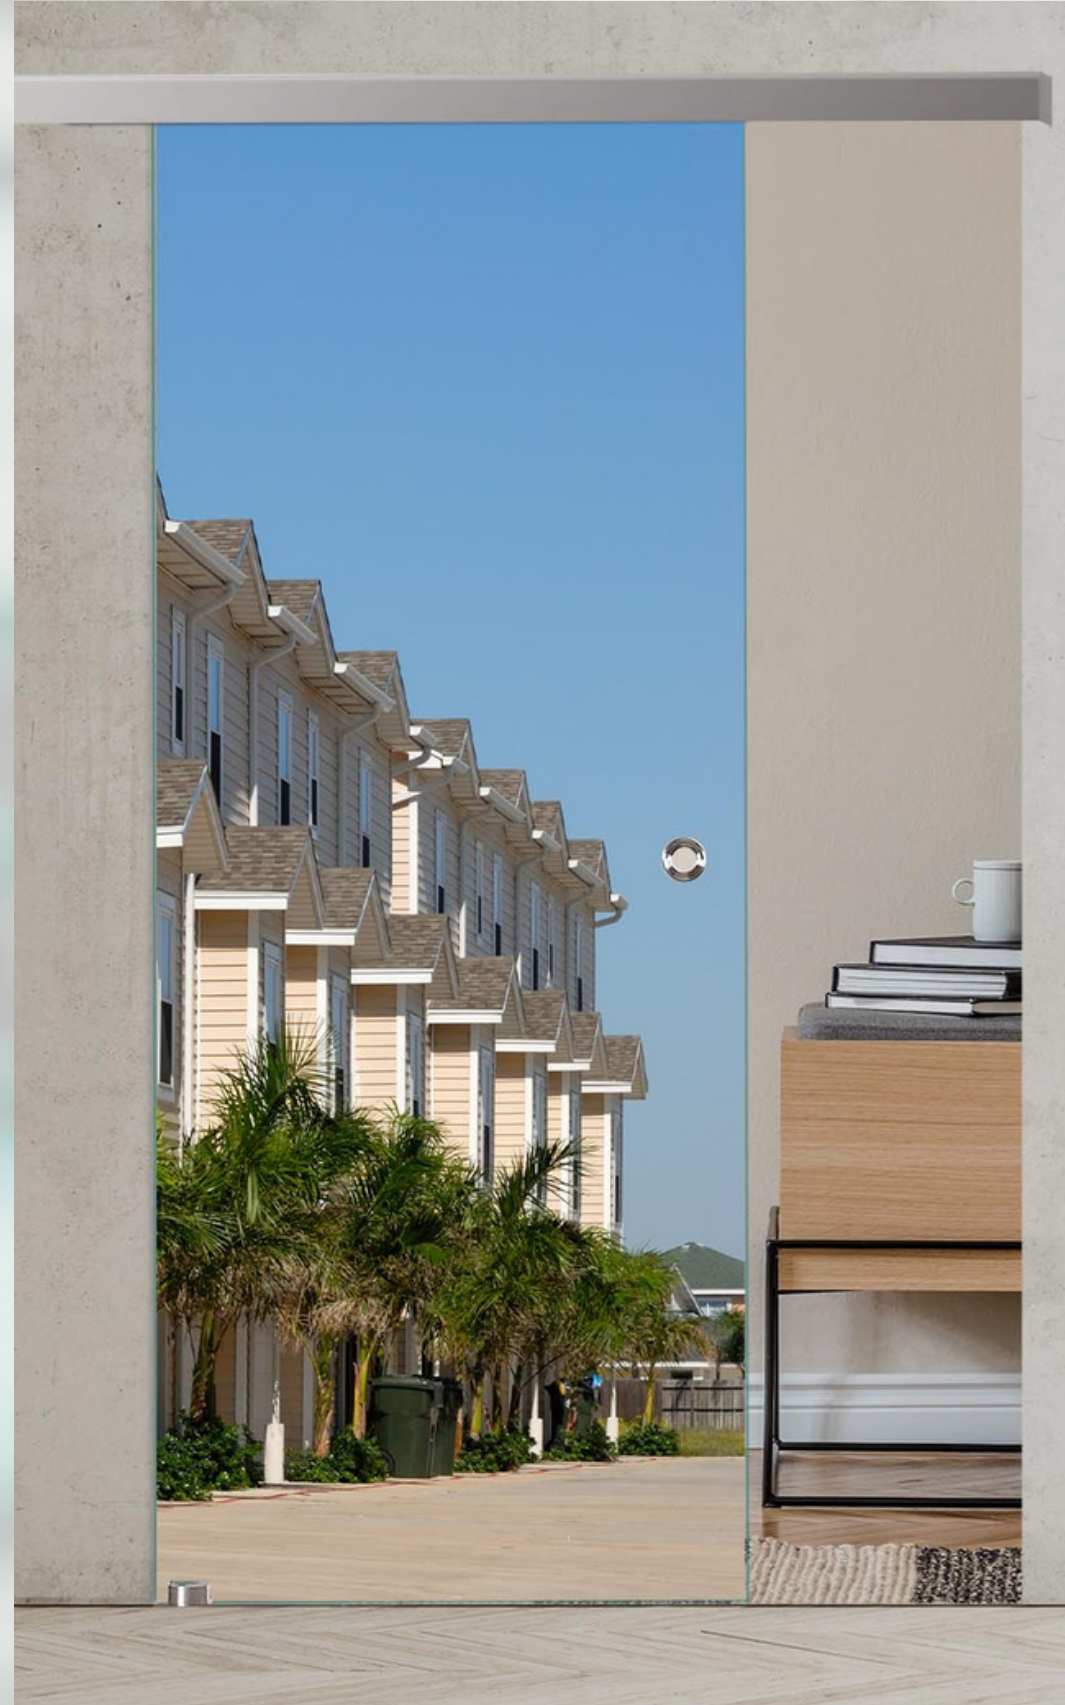

Set filigree highlights with a laser engraved door. With a laser decor, the glass is roughened on the surface. The laser shoots tiny particles of light onto the glass and creates a collection of dots, which in their entirety form a pattern. This makes it possible to apply a wide variety of decorations to the glass.
